### Fund Manager’s comment:

July was characterized by “risk-on” mode and the earnings season. Macro indicators have been good to neutral. 10 years government bond yields rose by 10-15bp. The Swedish krona strengthened on the back of strong BNP figures and credit spreads in EUR tightened 5bp in IG and 25bp in HY. In USD 10bp in IG and 20bp in HY. The credit spreads in the SEK market were stable. As stated in several monthly reports, the Swedish krona market is more expensive compared with other markets. Hence, we continue to be cautious. Unchanged situation from the ECB and the Swedish Riksbank. FED continue to decrease liquidity from the market.

The fund returned 0,07 per cent in July. The main positive contributors were Akelius perpetual and Aker BP. The fund has shorter credit duration than normal.
